

## **Roche** Heavy Duty Manual Height Adjustable Trolley (Up to 84" / 130kg)

This trolley accepts a wide range of screen sizes – interactive or not. The H-frame provides incredible strength, flexibility, and stability. The flat-panel mount can be fixed to the legs at almost any height. The outer legs fix to the H-frame with 70cm of range to provide levelling and height adjustment. At it's lowest setting it can almost touch the floor. At it's highest setting the display can be around 250cm high. The legs are 75cm wide to create a stable platform. This width reduces wobble and eliminates jacking (shuddering) as the display travels up due to uneven weight distribution. A simple cable remote control sticks to the side-at the top of the flat panel out of reach.

### **Specifications:**

Type: Trolley

Screen Size: Up to 84"

Electric Height Adjustment: No

Maximum Screen Weight: 115kg

Number of Braked Wheels: 2

Dimensions (Height): 167.5 – 182.5 cm

Dimensions (Width): 124.3 cm
