

Roche 4:3 Tabletop Screen (102 x 76cm – Viewing Area)

This table top screen is incredibly compact, light and portable. Although it is very lightweight at only 1.65kg, it has an impressive 50 inch (127cm) projection screen (measured across the diagonal). The support pole is conveniently stored within the screen case. This projection screen is ideal for table top presentations, one to one or small group sessions and training rooms. The screen has an integral carrying handle.

- 102x76cm (50 inch diagonal)
- Very stable with 4 fold out legs
- Tensioning mechanism ensures screen rolls smoothly in & out
- Easy to carry and store
- Integral carry handle

A Portable Projection Screen for Business Travel

The Roche Lightweight Table top Screen helps traveling professionals deliver knockout presentations on the go. With the Roche Lightweight Table Top Screen, there's no need to sacrifice the visual impact of a presentation because of the constraints of travel.

Accommodates Up to 50-Inch Display

Although small and compact, the Lightweight Portable Table top Screen opens wide enough for a 50-inch display on the diagonal. It's the ideal size for the boardroom, the classroom, and more.

Easy to Use, Packs Small

Business travellers know how important it is to travel light, which is why Roche brings you the Portable Table top Screen to be as compact as possible. It weighs only 1.65kg and measures just 50 inches long--easily small enough to fit in airplane overhead bins.
