

Top-Tec 485-Y02 Heavy Duty Tilting Wall Mount (37 - 60")

The fully adjustable Top Tec Secure Flat Panel Mounts are universal and fit all large-screen LCD and Plasma monitors. Developed in conjunction with major AV installers, the Top-Tec Secure Flat Panel Mount has been carefully designed for ease of use and is incredibly simple to install. The mounting bracket forms 2 sections - an exterior mounting frame that attaches to the wall, and an interior frame that is first attached to the flat panel screen. When the interior frame is combined with the exterior mounting frame the screen is secured. The Top Tec mount is secured with hardened anti-drill security locks with up to seven thousand possible key combinations. This specially developed flat panel mount maximises security and minimises the threat of attack.
